### About This Game

Distant Nightmare will immerse you in a dark and mysterious world thanks to VR. The game puts you in the shoes, and on the bike, of a child in a nightmare. Your objective is to cycle through the unexplored environments of your mind in hopes to survive the night and wake up the next day.

As you cycle through this VR world you will explore new environments, new creatures and challenges, as well as unlock a variety of bikes worthy of elusive nightmares and cycling demons. And if you want to push yourself even more and test your focus while you slumber and cycle, try the time trial mode where collecting time is the only way to survive. That's if surviving the nightmare is even an option...

So how far will you get, and what bikes (maybe not just bikes...) will you unlock to guide you through your gloomy dream. Will you hide in a corner and cry while you wait for the sand man, or will you get on your bike and ride through hell. The choice is yours.

*In the dark blue sky you keep  
And often through my curtains peep  
For you never shut your eye,  
'til the sun is in the sky...*

## REVIEWS

"It's not expensive and has a solid, creepy atmosphere. Worth a look if you like this genre!"

*UploadVR*

"Distant Nightmare might not be the scariest game you will ever play, but for value for money, it is worth downloading. With fast moving and challenging gameplay, but yet also deadly simple and with a score, you could also do a challenge mode with friends to see who gets the highest score. This game is for anyone who enjoyed "Into The Dead" if you loved that game, you will love this."

*VR Shop*

"In Distant Nightmare you are put into the mind of a child who is in the middle of a night terror. So you get on your bike and try to cycle your way out. Or at least last long enough to survive until this kid wakes up. So while in this dark world you will have to explore various environments, including a cemetery and a sewer, while various obstacles and nightmarish demons try to block your way. Distant Nightmare uses a scoring system that's based on the distance you travel in the game. So the better you overcome the roadblocks and monsters, the higher your score."

This was a GREAT game! Can't wait to see more from this game!

<https://www.youtube.com/watch?v=sPYnZazniBU>. one of the best vr games i have ever played ! 10/10 the only time i had problem was with the rocket its way to fast other then that the game is fun and for the right price. Only nightmare about this game is how bad it is. Not even worth .50 cents. Total embarrassment to the VR systems.
